Environmental facts :

- LYNEL SG references use a backing paper granted by its producer with **FSC label** and produced with **ECF** bleaching agent that eliminates pollution by toxic substances in paper-mills waste water;
- its **pH is slightly basic**, which is particularly relevant in areas where the preservation of documents, photos, archives... is requested;
- LYNEL range is totally free of heavy metals, aromatic amines, formal derivatives and, mostly, totally **free of phthalates (*)**;
- LYNEL is covered with **Rayon-viscose** textile fibres produced from **wood-cellulose**; the origin of the wood is always identified (eucalyptus);
- this **high-quality** covering material conforms with **safety requirements of European standard EN71 part 3 & part 9** (toys' regulation). (*) available for batch-numbers produced after November 2010.

Dainel® - SEF France

Distributor: SC Maria Paper SRL, Romania
(www.materiale-legatorie.ro)

Producer: Societe d'Enduction et de Flockage

All LYNEL and LYNEL THERMO references are available on SG substrate (paper) in rolls of 104cm x 100m; rolls; minimum order per colour is one roll; other substrates on special request.

Important :
LYNEL doesn't offer "THERMO" heat-burnishing effect after hot-stamping.
